

Send PolyMet to Summer School

To: MN Department of Natural Resources, U.S. Army Corps of Engineers, U.S. Environmental Protection Agency

CC: Sen. Amy Klobuchar, Sen. Al Franken

Subject: **Produce a supplemental or revised Draft Environmental Impact Statement for PolyMet**

To whom it may concern,

As outlined in the PolyMet mine proposal's draft Environmental Impact Statement (EIS), the mine poses severe and unacceptable threats to the environment of northeastern Minnesota. It also puts taxpayers at risk of being forced to pay for clean-up. Additionally, the review itself is incomplete, making a full and complete assessment of the project impossible.

Therefore, we, the undersigned, formally request the responsible government agencies produce a supplemental or revised draft EIS for the PolyMet mine proposal, complete with an additional public comment period, before proceeding to the final Environmental Impact Statement. This is what the U.S. Environmental Protection Agency has also requested due to the significant and unacceptable deficiencies in the draft EIS.

Sincerely,

	Signature/Print Name	Address	E-Mail
